

Metadata: A Love Letter to the Future

LOVE DATA WEEK WORKSHOP

MAGGIE DULL, HEAD OF METADATA STRATEGIES, RIVER CAMPUS LIBRARIES

Overview

What is metadata?

What can we do with metadata?

How do we do the things?

How do we share the things?

Why does metadata matter?

What is metadata?

WHY IS IT IMPORTANT?

Definition

Data about data.*

*Quite possibly the least helpful definition ever.

Try, Again

“Perhaps a more useful, ‘big picture’ way of thinking about metadata is as the sum total of what one can say at a given moment about any **information object** at any level of aggregation.”

From Gilliland, A. (2016). Setting the Stage. In M. Baca (Ed.) *Introduction to Metadata*. (3rd ed.) (pp. 1-20). Los Angeles, CA: Getty Publications. <http://www.getty.edu/publications/intrometadata/>

Or, Maybe

“Metadata is structured information that describes, explains, locates, or otherwise makes it easier to retrieve, use, or manage an **information resource**.”

From Hodge, G. M. (2004). Understanding Metadata. Bethesda, MD: NISO Press.

Information What?

Information Object or Information Resource
= Stuff You Care About

What is metadata?

WHAT IS IT MADE OF?

Statements About Resources

Metadata is comprised of
structured statements about resources

AMA Physician Masterfile

Description The AMA Physician Masterfile includes education, training and professional certification information on virtually all Doctors of Medicine (MD) and Doctors of Osteopathic Medicine (DO) in the United States, Puerto Rico, Virgin Islands, and certain Pacific Islands. It includes current and historical data for more than 1.4 million physicians, residents, and medical students in the United States. This...

Accuracy of preoperative imaging for myomectomy: NYU Langone Health EHR NYU Dataset

Description This dataset was compiled as part of a project to investigate the accuracy of presurgical imaging, either MRI and transvaginal (TVUS) ultrasound, in determining the number, location and weight of fibroids in a patient who underwent myomectomy. Data is included on all NYU Langone Health - Tisch patients who underwent myomectomy (either robotic, laparoscopic, or laparotomy) between January 1, 2014, and...

[Metadata management system for an information dispersed storage system](#)

SC Gladwin, MM England, DM Hendrickson... - US Patent ..., 2009 - Google Patents

Described is an information dispersal system in which original data to be stored is separated into a number of data "slices" in such a manner that the data in each subset is less usable or less recognizable or completely unusable or completely unrecognizable by itself except ...

Preserve and Manage

The image is a composite screenshot showing two web interfaces. On the left is the Wayback Machine homepage, which has a dark header with the text "Search the history of over 347 billion web pages on the Internet." and a search bar. Below the header is a navigation bar with icons for various media types and the text "INTERNET ARCHIVE". The main content area features a large icon of a classical building and the text: "Internet Archive is a non-profit library of millions of free books, movies, software, music, websites, and more." On the right is a Dropbox interface. It includes a top bar with "Try Dropbox Business", a search bar, and a user profile. Below this is a list of files and folders. A sidebar menu is open, showing options like "Files", "My files", "Sharing", "File requests", and "Deleted files". The main file list contains several folders, each with a checkbox, a name, a star icon, and a "Modified" status. At the bottom right of the Dropbox interface, there are buttons for "Privacy" and a help icon.

How do we do the things?

CONSIDERING STATEMENTS

Types of Metadata Statements

Descriptive

Administrative

Structural

Descriptive Metadata

Helps you identify or describe your stuff.

- Title, author, edition...
- Date, time, duration, geographic location...
- File name, file type, who created the file...

Administrative Metadata

Helps you manage and administer your stuff.

- **Technical** metadata often relates to information about the file itself.
- **Rights** metadata helps you understand the intellectual property rights regarding the resource.
- **Preservation** metadata helps you manage the files over a period of time.

Structural Metadata

Helps you define the relationship between parts.

- Defines chapters or sections within chapters.
- Relationship between subsets of a dataset.

How do we do the things?

PAUSE TO CONSIDER YOUR STUFF

Ask Yourself

- What do you have?
- What do you want to do with it?
- What can you say about it?
- Who is your audience?

Know Your Audience

STUDENT ASSIGNMENTS

Assignment1.pdf

Assignment1(2).pdf

ASKING FOR HELP

“I need that book on Matthew Vassar.
The cover is red.”

You can only leverage
metadata that you **have**
or that you can **understand**.

Title **Letters of Matthew Vassar available in the Vassar College Library / compiled by the Bibliography Department, Vassar College Library, 1963**

Imprint [Poughkeepsie, New York] : [Vassar College], [1965]

LOCATION	CALL #	STATUS
Archive/SpecColl (VC)	LD7182.65.V3 L48 1965 1	LIB USE ONLY
Archive/SpecColl (VC)	LD7182.65.V3 L48 1965 2	LIB USE ONLY
Archive/SpecColl (VC)	LD7182.65.V3 L48 1965 3	LIB USE ONLY
Archive/SpecColl (VC)	LD7182.65.V3 L48 1965 4	LIB USE ONLY

Descript 4 volumes (ciii, that is cxii, 538 leaves) ; 29 cm

Subject Vassar, Matthew, 1792-1868 -- Correspondence

Vassar College -- History

Add Na/Ti Vassar, Matthew, 1792-1868, author

Vassar College. Library, compiler

Reminder

“Metadata is **structured information** that describes, explains, locates, or otherwise makes it easier to retrieve, use, or manage an information resource.”

From Hodge, G. M. (2004). Understanding Metadata. Bethesda, MD: NISO Press.

Date: 06-08-10

How do we share the things?

METADATA SCHEMA

A solid blue horizontal bar at the bottom of the slide.

Metadata Schema

What is a schema?

A set of metadata definitions focused on the resources you are describing and/or a community of practice.

What does it do?

Schema create common vocabulary and semantics so that your audience understands your metadata and its structure.

Making Statements with Metadata Schemas

“Metadata schemes (also called schema) are sets of **metadata elements** designed for a **specific purpose**, such as describing a particular type of information resource. The definition or meaning of the elements themselves is known as the **semantics** of the scheme. The values given to metadata elements are the **content**.”

(Hodge's Understanding Metadata)

Creating Statements

Statements about resources are made up of **properties** and **values**.

PROPERTIES

- Title
- Subject

VALUES

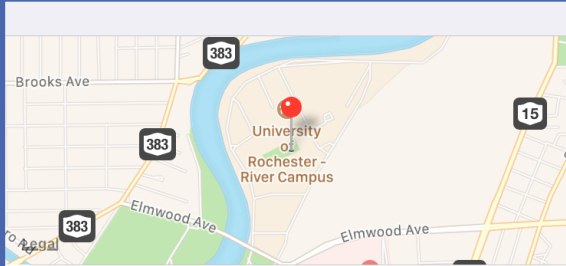

- The Pickwick Papers
- England – Social conditions – Fiction

Properties and Values

Metadata Schemas, such as Dublin Core, provide the **properties** we can use to make our statements.

Also makes suggestions to the kinds or types of **values** that go best with each property. These include **controlled vocabularies** or **data formats** (e.g., date).

Name	IMG_1352.JPG
Size	2.04 MB
Dimensions	3024x3024
Date Time	Dec 27, 2017, 8:36:31 AM
ISO Speed	ISO 25
F Number	f/1.8
Exposure Time	1/60 sec
Exposure Mode	Auto Exposure

Term Name: date		More details
URI	http://purl.org/dc/terms/date	
Label	Date	
Definition	A point or period of time associated with an event in the lifecycle of the resource.	
Comment	Date may be used to express temporal information at any level of granularity. Recommended practice is to express the date, date/time, or period of time according to ISO 8601-1 [ISO 8601-1] or a published profile of the ISO standard, such as the W3C Note on Date and Time Formats [W3CDTF] or the Extended Date/Time Format Specification [EDTF] . If the full date is unknown, month and year (YYYY-MM) or just year (YYYY) may be used. Date ranges may be specified using ISO 8601 period of time specification in which start and end dates are separated by a '/' (slash) character. Either the start or end date may be missing.	
Type of Term	Property	
Has Range	http://www.w3.org/2000/01/rdf-schema#Literal	
Subproperty of	<ul style="list-style-type: none"> Date (http://purl.org/dc/elements/1.1/date) 	

Term Name: title	
URI	http://purl.org/dc/terms/title
Label	Title
Definition	A name given to the resource.
Type of Term	Property
Has Range	http://www.w3.org/2000/01/rdf-schema#Literal
Subproperty of	<ul style="list-style-type: none"> Title (http://purl.org/dc/elements/1.1/title)

Reduce, Reuse, Recycle

Many communities of practice have established metadata schema that you can adopt.

- Reduce: do not re-invent the wheel
- Reuse: borrow and use statements created by others
- Recycle: others can borrow and use your statements

Appendix B: Metadata Elements

Metadata Element	Description	Dublin Core Value
Dataset Name / Title	The name of the dataset as it will appear on the platform.	Title
Dataset Description	Short description that explains the purpose of the Dataset and the data within	Description
Category	The general category that the dataset is included in on the site (The categories include: Economic Development, Education, Energy & Environment, Government & Finance, Health, Human Services, Public Safety, Recreation, Transparency, and Transportation).	Type
Tags / Keywords	Keywords about the dataset used for searching purposes.	Subject
Data Provided By	The Agency that provided the data.	Contributor
URL to Dataset Program Web Page	The URL to the program area web pages.	n/a
Responsible Organization Within Agency	The organization that the dataset owner is a part of	Creator
Time Period	The timeframe of data available in the associated data file (e.g., Beginning 2005).	Coverage (temporal)
Create Date	The date the resource was made available in its present form – auto generated	Date
Posting Frequency	How often the Dataset will be refreshed (e.g., Annually, Monthly, Daily).	n/a
Contact e-mail information	The email address the viewers of the data can use to ask questions about the dataset	n/a

Why does metadata matter?

IN CONCLUSION

Metadata allows you to achieve your goals.

BUT, you can only leverage
the metadata that you have.
